Subject Index

Volume 98, January 6/20–June 23, 2006

A

AAV vectors
Adeno-Associated Virus-Mediated Transduction of VEGF165 Improves Cardiac Tissue Viability and Functional Recovery After Permanent Coronary Occlusion in Conscious Dogs, 954

Acceptance rate
Circulation Research Editors' Annual Report for 2005, 291

ACE
Signaling by the Angiotensin-Converting Enzyme, 887

Acetyltransferase
Fishing for Function in Zebrafish, 723

Action potential
"Ryanogate": Who Leaked the Calcium?, 165

Acute rejection
Molecular Profiling Improves Diagnoses of Rejection and Infection in Transplanted Organs, e74

Adenosine
Extracellular Nucleotides and Adenosine Independently Activate AMP-Activated Protein Kinase in Endothelial Cells: Involvement of P2 Receptors and Adenosine Transporters, e39

Adenosine receptor
Endogenous RGS Proteins and Gα Subtypes Differentially Control Muscarinic and Adenosine-Mediated Chronotropic Effects, 659

Adenovirus
β-Adrenergic Stimulation of L-type Ca^{2+} Channels in Cardiac Myocytes Requires the Distal Carboxyl Terminus of α_{1C} but Not Serine 1928, e11

Adhesion
Adherent Platelets Recruit and Induce Differentiation of Murine Embryonic Endothelial Progenitor Cells to Mature Endothelial Cells In Vitro, e2

Adhesion molecules
Cardiomyocyte-Specific Deletion of the Coxsackievirus and Adenovirus Receptor Results in Hyperplasia of the Embryonic Left Ventricle and Abnormalities of Sinuatrial Valves, 923
Cdc42 Regulates Adherens Junction Stability and Endothelial Permeability by Inducing α-Catenin Interaction With the Vascular Endothelial Cadherin Complex, 73
High-Density Lipoprotein Hydrolysis by Endothelial Lipase Activates PPARα: A Candidate Mechanism for High-Density Lipoprotein-Mediated Repression of Leukocyte Adhesion, 490
Rho GTPases and Leukocyte Adhesion Receptor Expression and Function in Endothelial Cells, 757

β_2 adrenergic receptor
Endogenous RGS Proteins and Gα Subtypes Differentially Control Muscarinic and Adenosine-Mediated Chronotropic Effects, 659

β-Adrenergic stimulation
High Basal Protein Kinase A-Dependent Phosphorylation Drives Rhythmic Internal Ca^{2+} Store Oscillations and Spontaneous Beating of Cardiac Pacemaker Cells, 505

Adrenomedullin
Enhanced Vascular Responses to Adrenomedullin in Mice Overexpressing Receptor-Activity-Modifying Protein 2, 262

Adult stem cells
An In Vivo Analysis of Hematopoietic Stem Cell Potential: Hematopoietic Origin of Cardiac Valve Interstitial Cells, 690

Advanced-glycation end product
Diabetic Microangiopathy in Ischemic Limb Is a Disease of Disturbance of the Platelet-Derived Growth Factor-BB/Protein Kinase C Axis but Not of Impaired Expression of Angiogenic Factors, 55

Adventitia
Vascular Cell Locomotion: Osteopontin, NADPH Oxidase, and Matrix Metalloproteinase-9, 1453

Aging
Cellular Senescence Impairs Circadian Expression of Clock Genes In Vitro and In Vivo, 532

Akt
c-Jun N-Terminal Kinases Mediate Reactivation of Akt and Cardiomyocyte Survival After Hypoxic Injury In Vitro and In Vivo, 111
H11 Kinase Prevents Myocardial Infarction by Preemptive Preconditioning of the Heart, 280
The Transforming Growth Factor-β Superfamily Member Growth-Differentiation Factor-15 Protects the Heart From Ischemia/Reperfusion Injury, 351

Akt/PKB
Insulin-Like Growth Factor-1 and PTEN Deletion Enhance Cardiac L-Type Ca^{2+} Currents via Increased PI3Kα/PKB Signaling, 1390
Prime Time for JNK-Mediated Akt Reactivation in Hypoxia-Reoxygenation, 7

Allograft rejection
Early Growth Response-1 in Cardiovascular Pathobiology, 186

Alternans
From Pulsus to Pulseless: The Saga of Cardiac Alternans, 1244

AMP-activated protein kinase
Extracellular Nucleotides and Adenosine Independently Activate AMP-Activated Protein Kinase in Endothelial Cells: Involvement of P2 Receptors and Adenosine Transporters, e39

AMPK
H11 Kinase Prevents Myocardial Infarction by Preemptive Preconditioning of the Heart, 280

Anaphylaxis
Platelet-Derived Growth Factor BB-Mediated Normalization of Dermal Interstitial Fluid Pressure After Mast Cell Degranulation Depends on β3 but Not β1 Integrins, 635

Andermann syndrome
Neurogenic Mechanisms Contribute to Hypertension in Mice With Disruption of the K-Cl Cotransporter KCC3, 549

Angiogenesis
Adeno-Associated Virus-Mediated Transduction of VEGF165 Improves Cardiac Tissue Viability and Functional Recovery After Permanent Coronary Occlusion in Conscious Dogs, 954
Cardiac Ischemia Activates Vascular Endothelial Cadherin Promoter in Both Preexisting Vascular Cells and Bone Marrow Cells Involved in Neovascularization, 897
Common Protective and Diverse Smooth Muscle Cell Effects of AAV-Mediated Angiopoietin-1 and -2 Expression in Rat Cardiac Allograft Vasculopathy, 1373
Critical Roles of Muscle-Secreted Angiogenic Factors in Therapeutic Neovascularization, 1194
Early Growth Response-1 in Cardiovascular Pathobiology, 186
Gene Expression Profile Signatures Indicate a Role for Wnt Signaling in Endothelial Commitment From Embryonic Stem Cells, 1331
Impaired Angiogenesis in Glutathione Peroxidase-1-Deficient Mice Is Associated With Endothelial Progenitor Cell Dysfunction, 254
IP-10 Blocks Vascular Endothelial Growth Factor-Induced Endothelial Cell Motility and Tube Formation via Inhibition of Calpain, 617
Molecular Basis of Angiopathy in Diabetes Mellitus, 4
Nerve Cell Signposts in the Blood Vessel Roadmap, 440
VEGF Family Members Regulate Myocardial Tubulogenesis and Coronary Artery Formation in the Embryo, 947

Angiopoietin
Signaling and Functions of Angiopoietin-1 in Vascular Protection, 1014

Angiotensin
ACE Polymorphisms, 1123
Angiotensin II and Stretch Activate NADPH Oxidase to Destabilize Cardiac Kv4.3 Channel mRNA, 1040
Essential Role of Smad3 in Angiotensin II-Induced Vascular Fibrosis, 1032

Angiotensin II
Signaling by the Angiotensin-Converting Enzyme, 887
Smad3 Mediates Angiotensin II- and TGF-β1-Induced Vascular Fibrosis: Smad3 Thickens the Plot, 988

Angiotensin-converting enzyme 2
Angiotensin-Converting Enzyme II in the Heart and the Kidney, 463

Animal models of human disease
When Hearts Fail So Does Skeletal Muscle: Breaking a Vicious Cycle, 1456
Ankyrin repeat
A Novel Prostaglandin E Receptor 4-Associated Protein Participates in Antiinflammatory Signaling, 499
Antioxidants
Hypoxia-Mediated Degradation of Na,K-ATPase via Mitochondrial Reactive Oxygen Species and the Ubiquitin-Conjugating System, 1314
Apolipoprotein A-I
Elevated Homocysteine Reduces Apolipoprotein A-I Expression in Hyperhomocysteinemic Mice and in Males With Coronary Artery Disease, 564
Apoptosis
Axl, A Receptor Tyrosine Kinase, Mediates Flow-Induced Vascular Remodeling, 1446
Bone Morphogenetic Protein Receptor-2 Signaling Promotes Pulmonary Arterial Endothelial Cell Survival: Implications for Loss-of-Function Mutations in the Pathogenesis of Pulmonary Hypertension, 209
c-Jun N-Terminal Kinases Mediate Reactivation of Akt and Cardiomyocyte Survival After Hypoxic Injury In Vitro and In Vivo, 111
Cardiac Myocyte Apoptosis Is Associated With Increased DNA Damage and Decreased Survival in Murine Models of Obesity, 119
Cardiac-Specific Deletion of *Gata4* Reveals Its Requirement for Hypertrophy, Compensation, and Myocyte Viability, 837
Exercise Can Prevent and Reverse the Severity of Hypertrophic Cardiomyopathy, 540
A Farewell Kiss Triggers a Broken Heart?, 1117
GATA4 and the Two Sides of Gene Expression Reprogramming, 715
H11 Kinase Prevents Myocardial Infarction by Preemptive Preconditioning of the Heart, 280
Integrin-Mediated Transcriptional Activation of Inhibitor of Apoptosis Proteins Protects Smooth Muscle Cells Against Apoptosis Induced by Degraded Collagen, 1490
MCP-1 Induces a Novel Transcription Factor With Proapoptotic Activity, 1107
Prime Time for JNK-Mediated Akt Reactivation in Hypoxia-Reoxygenation, 7
Role of Nuclear Ca^{2+}/Calmodulin-Stimulated Phosphodiesterase 1A in Vascular Smooth Muscle Cell Growth and Survival, 777
Spatio-Temporal Diversity of Apoptosis Within the Vascular Wall in Pulmonary Arterial Hypertension: Heterogeneous BMP Signaling May Have Therapeutic Implications, 172
Statins Protect Human Aortic Smooth Muscle Cells From Inorganic Phosphate-Induced Calcification by Restoring Gas6-Axl Survival Pathway, 1024
The Transforming Growth Factor-β Superfamily Member Growth-Differentiation Factor-15 Protects the Heart From Ischemia/Reperfusion Injury, 351
Arachidonic acid
Endothelial Dysfunction and Hypertension in Rats Transduced With CYP4A2 Adenovirus, 962
Increased Expression of Cyclooxygenase-2 Mediates Enhanced Contraction to Endothelin ET_A Receptor Stimulation in Endothelial Nitric Oxide Synthase Knockout Mice, 1439
Arrhythmia
Arrhythmogenic Mutation-Linked Defects in Ryanodine Receptor Autoregulation Reveal a Novel Mechanism of Ca^{2+} Release Channel Dysfunction, 88
Differential Calcineurin/NFATc3 Activity Contributes to the I_{to} Transmural Gradient in the Mouse Heart, 1306
Electrical Coupling of Cardiac Myocyte Cell Sheets to the Heart, 573
From Pulsus to Pulseless: The Saga of Cardiac Alternans, 1244
Is the Ryanodine Receptor a Target for Antiarrhythmic Therapy?, 1232
Pulsatile Cardiac Tissue Grafts Using a Novel Three-Dimensional Cell Sheet Manipulation Technique Functionally Integrates With the Host Heart, In Vivo, 705
Reducing Ryanodine Receptor Open Probability As a Means to Abolish Spontaneous Ca^{2+} Release and Increase Ca^{2+} Transient Amplitude in Adult Ventricular Myocytes, 1299
Structure-Related Initiation of Reentry by Rapid Pacing in Monolayers of Cardiac Cells, e29
Arterial injury
A $CD34^-$/$CD133^+$/VEGFR-2^+ Endothelial Progenitor Cell Subpopulation With Potent Vasoregenerative Capacities, e20
Arteries
Urocortin-Induced Decrease in Ca^{2+} Sensitivity of Contraction in Mouse Tail Arteries Is Attributable to cAMP-Dependent Dephosphorylation of MYPT1 and Activation of Myosin Light Chain Phosphatase, 1159
Arterioles
Silent Inward Rectifier K^+ Channels in Hypercholesterolemia, 982
Arteriosclerosis
Common Protective and Diverse Smooth Muscle Cell Effects of AAV-Mediated Angiopoietin-1 and -2 Expression in Rat Cardiac Allograft Vasculopathy, 1373
A Novel Prostaglandin E Receptor 4-Associated Protein Participates in Antiinflammatory Signaling, 499
Artery
Small-Diameter Artificial Arteries Engineered In Vitro, 25
Aspirin
De Novo Synthesis of Cyclooxygenase-1 Counteracts the Suppression of Platelet Thromboxane Biosynthesis by Aspirin, 593
ATF6
Endoplasmic Reticulum Stress Gene Induction and Protection From Ischemia/Reperfusion Injury in the Hearts of Transgenic Mice With a Tamoxifen-Regulated Form of ATF6, 1186
Atherosclerosis
A $CD34^-$/$CD133^+$/VEGFR-2^+ Endothelial Progenitor Cell Subpopulation With Potent Vasoregenerative Capacities, e20
Cyclophilin A Is Secreted by a Vesicular Pathway in Vascular Smooth Muscle Cells, 811
Desensitization of Platelet-Derived Growth Factor Receptor-β by Oxidized Lipids in Vascular Cells and Atherosclerotic Lesions: Prevention by Aldehyde Scavengers, 785
Differences in Vascular Bed Disease Susceptibility Reflect Differences in Gene Expression Response to Atherogenic Stimuli, 200
Early Growth Response-1 in Cardiovascular Pathobiology, 186
Endothelial and Antithrombotic Actions of HDL, 1352
A Farewell Kiss Triggers a Broken Heart?, 1117
Five Easy Pieces: The Obesity Paradigm, 576
Identification of Prostaglandin E2 Receptor Subtype 2 As a Receptor Activated by OxPAPC, 642
Integrin-Mediated Transcriptional Activation of Inhibitor of Apoptosis Proteins Protects Smooth Muscle Cells Against Apoptosis Induced by Degraded Collagen, 1490
Mechanisms of Endothelial Cell Heterogeneity in Health and Disease, 159
Raised Plasma Soluble P-Selectin in Peripheral Arterial Occlusive Disease Enhances Leukocyte Adhesion, 149
A Rancid Culprit in Vascular Inflammation Acts on the Prostaglandin Receptor EP2, 587
Sphingolipids and Transient Receptor Potential Channels: Evolutionarily Ancient Families Now Joined, 1347
TRP Proteins: A New Dimension in the Treatment of Occlusive Vascular Disease, 446
ATP
Hypoxia-Mediated Degradation of Na,K-ATPase via Mitochondrial Reactive Oxygen Species and the Ubiquitin-Conjugating System, 1314
ATP-sensitive K^+ (K_{ATP}) channels
A New Insight Into the Pathogenesis of Coronary Vasospasm, 579
Atrial septal defect
Quantitative Trait Loci Modifying Cardiac Atrial Septal Morphology and Risk of Patent Foramen Ovale in the Mouse, 651
Automaticity
Endogenous RGS Proteins and Gα Subtypes Differentially Control Muscarinic and Adenosine-Mediated Chronotropic Effects, 659
Auxiliary subunit
14-3-3 Is a Regulator of the Cardiac Voltage-Gated Sodium Channel Nav1.5, 1538
MAPK = Mitogen-Activated Protein KChIP2?: Unraveling Signaling Pathways Controlling Cardiac Ito Expression, 301

Axl
Axl, A Receptor Tyrosine Kinase, Mediates Flow-Induced Vascular Remodeling, 1446
Statins Protect Human Aortic Smooth Muscle Cells From Inorganic Phosphate-Induced Calcification by Restoring Gas6-Axl Survival Pathway, 1024
Axon guidance
Nerve Cell Signposts in the Blood Vessel Roadmap, 440

B

Basic science
Signaling by the Angiotensin-Converting Enzyme, 887
Bicarbonate
NBCn1 (slc4a7) Mediates the Na^+-Dependent Bicarbonate Transport Important for Regulation of Intracellular pH in Mouse Vascular Smooth Muscle Cells, 515
Bile acids
Downregulation of Endothelin-1 by Farnesoid X Receptor in Vascular Endothelial Cells, 192
Blood flow
Going With the Flow: Smooth Muscle TRPM7 Channels and the Vascular Response to Blood Flow, 163
Blood pressure
Antihypertensive Effects of the Putative T-Type Calcium Channel Antagonist Mibefradil Are Mediated by the L-Type Calcium Channel $Ca_v1.2$, 105
Enhanced Vascular Responses to Adrenomedullin in Mice Overexpressing Receptor-Activity-Modifying Protein 2, 262
Neurogenic Mechanisms Contribute to Hypertension in Mice With Disruption of the K-Cl Cotransporter KCC3, 549
Blood vessel
Nerve Cell Signposts in the Blood Vessel Roadmap, 440
Bone marrow
An In Vivo Analysis of Hematopoietic Stem Cell Potential: Hematopoietic Origin of Cardiac Valve Interstitial Cells, 690
Postinfarct Cytokine Therapy Regenerates Cardiac Tissue and Improves Left Ventricular Function, 1098
Therapeutic Angiogenesis: Another Passing Phase?, 1115
Bone morphogenetic protein
Bone Morphogenetic Protein Receptor-2 Signaling Promotes Pulmonary Arterial Endothelial Cell Survival: Implications for Loss-of-Function Mutations in the Pathogenesis of Pulmonary Hypertension, 209
Serotonin Increases Susceptibility to Pulmonary Hypertension in *BMPR2*-Deficient Mice, 818
Bone morphogenetic receptor-2
Bone Morphogenetic Protein Receptor-2 Signaling Promotes Pulmonary Arterial Endothelial Cell Survival: Implications for Loss-of-Function Mutations in the Pathogenesis of Pulmonary Hypertension, 209

C

c-Jun NH2-terminal kinase
c-Jun N-Terminal Kinases Mediate Reactivation of Akt and Cardiomyocyte Survival After Hypoxic Injury In Vitro and In Vivo, 111
Signaling by the Angiotensin-Converting Enzyme, 887
Ca^{2+}
Effects of Congestive Heart Failure on Ca^{2+} Handling in Skeletal Muscle During Fatigue, 1514
Ca^{2+} channels
Hypoxia Inducible Factor 1 Mediates Hypoxia-Induced TRPC Expression and Elevated Intracellular Ca^{2+} in Pulmonary Arterial Smooth Muscle Cells, 1528
Ca^{2+} release
Maximum Phosphorylation of the Cardiac Ryanodine Receptor at Serine-2809 by Protein Kinase A Produces Unique Modifications to Channel Gating and Conductance Not Observed at Lower Levels of Phosphorylation, 1506
Ca^{2+} sensitization
Activation of Myocardial Contraction by the N-Terminal Domains of Myosin Binding Protein-C, 1290
Ca^{2+}-induced Ca^{2+} release
Abnormal Interactions of Calsequestrin With the Ryanodine Receptor Calcium Release Channel Complex Linked to Exercise-Induced Sudden Cardiac Death, 1151
Calcification
Dexamethasone Downregulates Calcification-Inhibitor Molecules and Accelerates Osteogenic Differentiation of Vascular Pericytes: Implications for Vascular Calcification, 1264
N-3 Fatty Acids Inhibit Vascular Calcification Via the p38-Mitogen-Activated Protein Kinase and Peroxisome Proliferator-Activated Receptor-γ Pathways, 727
Pitting Phosphate Transport Inhibitors Against Vascular Calcification, 857
Statins Protect Human Aortic Smooth Muscle Cells From Inorganic Phosphate-Induced Calcification by Restoring Gas6-Axl Survival Pathway, 1024
Calcineurin
Differential Regulation of Endothelial Cell Activation by Complement and Interleukin 1α, 793
Calcium
A New Role for Calmodulin in Ion Channel Biology, 979
Ca^{2+}, Calmodulin, and Cyclins in Vascular Smooth Muscle Cell Cycle, 1240
A Calmodulin-Binding Site on Cyclin E Mediates Ca^{2+}-Sensitive G_1/S Transitions in Vascular Smooth Muscle Cells, 1273
Differential Calcineurin/NFATc3 Activity Contributes to the I_{to} Transmural Gradient in the Mouse Heart, 1306
Excitation-Transcription Coupling in Arterial Smooth Muscle, 868
A Female Way to Protect the Heart: Say NO to Calcium, 298
Increased Sarcoplasmic Reticulum Calcium Leak but Unaltered Contractility by Acute CaMKII Overexpression in Isolated Rabbit Cardiac Myocytes, 235
Is the Ryanodine Receptor a Target for Antiarrhythmic Therapy?, 1232
Reducing Ryanodine Receptor Open Probability As a Means to Abolish Spontaneous Ca^{2+} Release and Increase Ca^{2+} Transient Amplitude in Adult Ventricular Myocytes, 1299
"Ryanogate": Who Leaked the Calcium?, 165
Calcium channel
Antihypertensive Effects of the Putative T-Type Calcium Channel Antagonist Mibefradil Are Mediated by the L-Type Calcium Channel $Ca_v1.2$, 105
TRP Proteins: A New Dimension in the Treatment of Occlusive Vascular Disease, 446
A Sphingosine-1-Phosphate-Activated Calcium Channel Controlling Vascular Smooth Muscle Cell Motility, 1381
Upregulated TRPC1 Channel in Vascular Injury In Vivo and Its Role in Human Neointimal Hyperplasia, 557
Calcium current
β-Adrenergic Stimulation of L-type Ca^{2+} Channels in Cardiac Myocytes Requires the Distal Carboxyl Terminus of α_{1C} but Not Serine 1928, e11
Calcium sensitivity
Urocortin-Induced Decrease in Ca^{2+} Sensitivity of Contraction in Mouse Tail Arteries Is Attributable to cAMP-Dependent Dephosphorylation of MYPT1 and Activation of Myosin Light Chain Phosphatase, 1159
Calmodulin
Ca^{2+}, Calmodulin, and Cyclins in Vascular Smooth Muscle Cell Cycle, 1240
A Calmodulin-Binding Site on Cyclin E Mediates Ca^{2+}-Sensitive G_1/S Transitions in Vascular Smooth Muscle Cells, 1273
Calmodulin Is Essential for Cardiac I_{KS} Channel Gating and Assembly: Impaired Function in Long-QT Mutations, 1055
KCNQ1 Assembly and Function Is Blocked by Long-QT Syndrome Mutations That Disrupt Interaction With Calmodulin, 1048
A New Role for Calmodulin in Ion Channel Biology, 979
Calsequestrin
Abnormal Interactions of Calsequestrin With the Ryanodine Receptor Calcium Release Channel Complex Linked to Exercise-Induced Sudden Cardiac Death, 1151
CaMKII
Increased Sarcoplasmic Reticulum Calcium Leak but Unaltered Contractility by Acute CaMKII Overexpression in Isolated Rabbit Cardiac Myocytes, 235

"Ryanogate": Who Leaked the Calcium?, 165

CaMKK
Extracellular Nucleotides and Adenosine Independently Activate AMP-Activated Protein Kinase in Endothelial Cells: Involvement of P2 Receptors and Adenosine Transporters, e39

cAMP
β-Adrenergic Stimulation of L-type Ca^{2+} Channels in Cardiac Myocytes Requires the Distal Carboxyl Terminus of α_{1C} but Not Serine 1928, e11
Closing the Cycle: Skp2 Modulates Cyclic Nucleotides Antiproliferative Effects, 1113
Compartmentalized Phosphodiesterase-2 Activity Blunts β-Adrenergic Cardiac Inotropy via an NO/cGMP-Dependent Pathway, 226
IP-10 Blocks Vascular Endothelial Growth Factor-Induced Endothelial Cell Motility and Tube Formation via Inhibition of Calpain, 617
Is cAMP Good or Bad? Depends on Where It's Made, 582
A Specific Pattern of Phosphodiesterases Controls the cAMP Signals Generated by Different G_s-Coupled Receptors in Adult Rat Ventricular Myocytes, 1081

Cardiac
GDF15/MIC-1 Functions As a Protective and Antihypertrophic Factor Released From the Myocardium in Association With SMAD Protein Activation, 342
When Is a Fly in the Ointment a Solution and not a Problem?, 1110

Cardiac development
Cardiomyocyte-Specific Deletion of the Coxsackievirus and Adenovirus Receptor Results in Hyperplasia of the Embryonic Left Ventricle and Abnormalities of Sinuatrial Valves, 923
Extracellular Matrix Remodeling and Organization in Developing and Diseased Aortic Valves, 1431

Cardiac electrophysiology
Structure-Related Initiation of Reentry by Rapid Pacing in Monolayers of Cardiac Cells, e29

Cardiac fibrosis
Smad3 Mediates Angiotensin II- and TGF-β1-Induced Vascular Fibrosis: Smad3 Thickens the Plot, 988

Cardiac function
Induction of HIF-1α and iNOS With siRNA: A Novel Mechanism for Myocardial Protection, 10

Cardiac hypertrophy
Control of Cardiac Growth by Histone Acetylation/Deacetylation, 15
Diabetic Cardiomyopathy: The Search for a Unifying Hypothesis, 596
Early Growth Response-1 in Cardiovascular Pathobiology, 186
Mitogen-Activated Protein Kinases Control Cardiac KChIP2 Gene Expression, 386
Myocardin Induces Cardiomyocyte Hypertrophy, 1089

Cardiac ischemia/reperfusion
Hypoxia Inducible Factor-1 Activation by Prolyl 4-Hydroxylase-2 Gene Silencing Attenuates Myocardial Ischemia Reperfusion Injury, 133

Cardiac L-type Ca^{2+} channels
Mission Impossible: IGF-1 and PTEN Specifically "Akt"ing on Cardiac L-Type Ca^{2+} Channels, 1349

Cardiac myocyte apoptosis
Cardiomyocyte Cell Cycle Activation Ameliorates Fibrosis in the Atrium, 141

Cardiac myocytes
Activation of Myocardial Contraction by the N-Terminal Domains of Myosin Binding Protein-C, 1290
Myocardin Induces Cardiomyocyte Hypertrophy, 1089
No Apparent Requirement for Neuronal Sodium Channels in Excitation-Contraction Coupling in Rat Ventricular Myocytes, 667

Cardiac myofibroblasts
Electrotonic Modulation of Cardiac Impulse Conduction by Myofibroblasts, 801

Cardiac regeneration
Adeno-Associated Virus-Mediated Transduction of VEGF165 Improves Cardiac Tissue Viability and Functional Recovery After Permanent Coronary Occlusion in Conscious Dogs, 954

Cardiac remodeling
Evidence of Structural Remodeling in the Dyssynchronous Failing Heart, 125

Cardiac transcription factors
Myocardin Induces Cardiomyocyte Hypertrophy, 1089

Cardiac transplantation
Molecular Profiling Improves Diagnoses of Rejection and Infection in Transplanted Organs, e74
Pulsatile Cardiac Tissue Grafts Using a Novel Three-Dimensional Cell Sheet Manipulation Technique Functionally Integrates With the Host Heart, In Vivo, 705

Cardiomyocyte
Compartmentalized Phosphodiesterase-2 Activity Blunts β-Adrenergic Cardiac Inotropy via an NO/cGMP-Dependent Pathway, 226
Microtubules Modulate the Stiffness of Cardiomyocytes Against Shear Stress, 81
Stem Cells as a Source of Regenerative Cardiomyocytes, 1002

Cardiomyocyte proliferation
Cardiomyocyte Cell Cycle Activation Ameliorates Fibrosis in the Atrium, 141

Cardiomyogenesis
Induction of Cardiogenesis in Embryonic Stem Cells via Downregulation of Notch1 Signaling, 1471

Cardiomyopathy
Cardiomyocyte-Specific Deletion of the Coxsackievirus and Adenovirus Receptor Results in Hyperplasia of the Embryonic Left Ventricle and Abnormalities of Sinuatrial Valves, 923
Proteomics of the Heart: Unraveling Disease, 309

Cardiovascular
How Senescent Vascular Cells Lose Their *Clock* Age-Dependent Impairment of Circadian Rhythmicity in Smooth Muscle Cells, 450

Cardiovascular disease
Five Easy Pieces: The Obesity Paradigm, 576
Rho Kinases in Cardiovascular Physiology and Pathophysiology, 322

Carotid arteries
Axl, A Receptor Tyrosine Kinase, Mediates Flow-Induced Vascular Remodeling, 1446
Endothelial Progenitor Thrombospondin-1 Mediates Diabetes-Induced Delay in Reendothelialization Following Arterial Injury, 697

Casein
Hypertrophic Cardiomyopathy: Exercise and Eat Right, 443

Caspase activation
Integrin-Mediated Transcriptional Activation of Inhibitor of Apoptosis Proteins Protects Smooth Muscle Cells Against Apoptosis Induced by Degraded Collagen, 1490

Catecholaminergic polymorphic ventricular tachycardia
Abnormal Interactions of Calsequestrin With the Ryanodine Receptor Calcium Release Channel Complex Linked to Exercise-Induced Sudden Cardiac Death, 1151

Catenins
Cdc42 Regulates Adherens Junction Stability and Endothelial Permeability by Inducing α-Catenin Interaction With the Vascular Endothelial Cadherin Complex, 73

Caveolae
Caveolin Plays a Central Role in Endothelial Progenitor Cell Mobilization and Homing in SDF-1-Driven Postischemic Vasculogenesis, 1219

Caveolin
Caveolin Plays a Central Role in Endothelial Progenitor Cell Mobilization and Homing in SDF-1-Driven Postischemic Vasculogenesis, 1219

CD34/CD133
A $CD34^-/CD133^+/VEGFR\text{-}2^+$ Endothelial Progenitor Cell Subpopulation With Potent Vasoregenerative Capacities, e20

CD4
A Farewell Kiss Triggers a Broken Heart?, 1117

CD45
Cardiac Ischemia Activates Vascular Endothelial Cadherin Promoter in Both Preexisting Vascular Cells and Bone Marrow Cells Involved in Neovascularization, 897

Cdc37
Direct Interaction of the Cell Division Cycle 37 Homolog Inhibits Endothelial Nitric Oxide Synthase Activity, 335

Cdc42
Cdc42 Regulates Adherens Junction Stability and Endothelial Permeability by Inducing α-Catenin Interaction With the Vascular Endothelial Cadherin Complex, 73
CDK2
A Calmodulin-Binding Site on Cyclin E Mediates Ca^{2+}-Sensitive G_1/S Transitions in Vascular Smooth Muscle Cells, 1273
Cell adaptation
Hypoxia-Mediated Degradation of Na,K-ATPase via Mitochondrial Reactive Oxygen Species and the Ubiquitin-Conjugating System, 1314
Cell adhesion
Focal Adhesions: Paradigm for a Signaling Nexus, 606
Cell adhesion molecules
Raised Plasma Soluble P-Selectin in Peripheral Arterial Occlusive Disease Enhances Leukocyte Adhesion, 149
Cell culture
Structure-Related Initiation of Reentry by Rapid Pacing in Monolayers of Cardiac Cells, e29
Cell cycle
Ca^{2+}, Calmodulin, and Cyclins in Vascular Smooth Muscle Cell Cycle, 1240
A Calmodulin-Binding Site on Cyclin E Mediates Ca^{2+}-Sensitive G_1/S Transitions in Vascular Smooth Muscle Cells, 1273
Closing the Cycle: Skp2 Modulates Cyclic Nucleotides Antiproliferative Effects, 1113
Cell cycle progression
A Calmodulin-Binding Site on Cyclin E Mediates Ca^{2+}-Sensitive G_1/S Transitions in Vascular Smooth Muscle Cells, 1273
Cell migration
LPP Expression During In Vitro Smooth Muscle Differentiation and Stent-Induced Vascular Injury, 378
Neuronal Chemorepellent Slit2 Inhibits Vascular Smooth Muscle Cell Migration by Suppressing Small GTPase Rac1 Activation, 480
Cell proliferation
Desensitization of Platelet-Derived Growth Factor Receptor-β by Oxidized Lipids in Vascular Cells and Atherosclerotic Lesions: Prevention by Aldehyde Scavengers, 785

High Basal Protein Kinase A-Dependent Phosphorylation Drives Rhythmic Internal Ca^{2+} Store Oscillations and Spontaneous Beating of Cardiac Pacemaker Cells, 505
A Novel Mechanism of Pacemaker Control That Depends on High Levels of cAMP and PKA-Dependent Phosphorylation: A Precisely Controlled Biological Clock, 437

Long-QT syndrome
Calmodulin Is Essential for Cardiac I_{KS} Channel Gating and Assembly: Impaired Function in Long-QT Mutations, 1055
KCNQ1 Assembly and Function Is Blocked by Long-QT Syndrome Mutations That Disrupt Interaction With Calmodulin, 1048

Lymphocyte
T Cell Recognition and Killing of Vascular Smooth Muscle Cells in Acute Coronary Syndrome, 1168

Lymphoid
Antigen-Independent Targeting of Long-Lived $CD4^+$ Cytolytic T Effector Cells to Lesions of Atherosclerosis, 434

M

Macrophage
Acute Antiinflammatory Properties of Statins Involve Peroxisome Proliferator-Activated Receptor-α via Inhibition of the Protein Kinase C Signaling Pathway, 361
Atherosclerotic Plaque Macrophage Transcriptional Regulators Are Expressed in Blood and Modulated by Tristetraprolin, 1282
A Novel Prostaglandin E Receptor 4-Associated Protein Participates in Antiinflammatory Signaling, 499
Signaling by the Angiotensin-Converting Enzyme, 887

MAP Kinases
GDF15, a Cardioprotective TGF-β Superfamily Protein, 294
MAPK = Mitogen-Activated Protein KChIP2?: Unraveling Signaling Pathways Controlling Cardiac Ito Expression, 301

Mass spectrometry
Proteomics of the Heart: Unraveling Disease, 309

MCP-1
Monocyte Chemoattractant Protein-1 Induces a Novel Transcription Factor That Causes Cardiac Myocyte Apoptosis and Ventricular Dysfunction, 1177

MCP-1–induced transcription factor
Monocyte Chemoattractant Protein-1 Induces a Novel Transcription Factor That Causes Cardiac Myocyte Apoptosis and Ventricular Dysfunction, 1177

MCP-induced protein (MCPIP)
Monocyte Chemoattractant Protein-1 Induces a Novel Transcription Factor That Causes Cardiac Myocyte Apoptosis and Ventricular Dysfunction, 1177

MCPIP-induced cell death
Monocyte Chemoattractant Protein-1 Induces a Novel Transcription Factor That Causes Cardiac Myocyte Apoptosis and Ventricular Dysfunction, 1177

Mechanical force
Focal Adhesions: Paradigm for a Signaling Nexus, 606

Mechanotransduction
Myocyte Shearing, Myocardial Sheets, and Microtubules, 1

Membrane attack complex
Differential Regulation of Endothelial Cell Activation by Complement and Interleukin 1α, 793

Membrane transport
Vesicular Trafficking of Tyrosine Kinase Receptors and Associated Proteins in the Regulation of Signaling and Vascular Function, 743

Memory T cell
Antigen-Independent Targeting of Long-Lived $CD4^+$ Cytolytic T Effector Cells to Lesions of Atherosclerosis, 434

Metalloproteinase
An Osteopontin-NADPH Oxidase Signaling Cascade Promotes Pro-Matrix Metalloproteinase 9 Activation in Aortic Mesenchymal Cells, 1479

Methylenetetrahydrofolate reductase
Elevated Homocysteine Reduces Apolipoprotein A-I Expression in Hyperhomocysteinemic Mice and in Males With Coronary Artery Disease, 564

MHC II
Interferon-γ Induces Major Histocompatibility Class II Transactivator (CIITA), Which Mediates Collagen Repression and Major Histocompatibility Class II Activation by Human Aortic Smooth Muscle Cells, 472
Smooth Muscle Cell: A Key Cell for Plaque Vulnerability Regulation?, 448

Mibefradil
Antihypertensive Effects of the Putative T-Type Calcium Channel Antagonist Mibefradil Are Mediated by the L-Type Calcium Channel Ca,1.2, 105

Microarray
Differences in Vascular Bed Disease Susceptibility Reflect Differences in Gene Expression Response to Atherogenic Stimuli, 200
Gene Expression Profile Signatures Indicate a Role for Wnt Signaling in Endothelial Commitment From Embryonic Stem Cells, 1331
Molecular Profiling Improves Diagnoses of Rejection and Infection in Transplanted Organs, e74
Thrombin and NAD(P)H Oxidase-Mediated Regulation of CD44 and BMP4-Id Pathway in VSMC, Restenosis, and Atherosclerosis, 1254

MicroPET
Emerging Imaging Techniques, 879

MicroSPECT
Emerging Imaging Techniques, 879

Microtubules
Microtubules Modulate the Stiffness of Cardiomyocytes Against Shear Stress, 81
Myocyte Shearing, Myocardial Sheets, and Microtubules, 1
Shear Stress Regulates Forward and Reverse Planar Cell Polarity of Vascular Endothelium In Vivo and In Vitro, 939

Migration
High-Density Lipoprotein Promotes Endothelial Cell Migration and Reendothelialization via Scavenger Receptor-B Type I, 63
Nerve Cell Signposts in the Blood Vessel Roadmap, 440
Organizing Motility: LIM Domains, LPP, and Smooth Muscle Migration, 306
Syndecan-4 Clustering Induces Cell Migration in a PDZ-Dependent Manner, 1398
Mineralization
Pitting Phosphate Transport Inhibitors Against Vascular Calcification, 857
MMPs
Vascular Cell Locomotion: Osteopontin, NADPH Oxidase, and Matrix Metalloproteinase-9, 1453
Molecular biology
The Rac and Rho Hall of Fame: A Decade of Hypertrophic Signaling Hits, 730
Monocyte
Atherosclerotic Plaque Macrophage Transcriptional Regulators Are Expressed in Blood and Modulated by Tristetraprolin, 1282
A Rancid Culprit in Vascular Inflammation Acts on the Prostaglandin Receptor EP2, 587
Monocyte binding
Identification of Prostaglandin E2 Receptor Subtype 2 As a Receptor Activated by OxPAPC, 642
Monocyte/macrophages
Monocyte Chemoattractant Protein-1 Induces a Novel Transcription Factor That Causes Cardiac Myocyte Apoptosis and Ventricular Dysfunction, 1177
Morphogenesis
Formation of the Venous Pole of the Heart From an *Nkx2-5*-Negative Precursor Population Requires *Tbx18*, 1555
Morpholino
Fishing for Function in Zebrafish, 723
Mortality
Cardiac Myocyte Apoptosis Is Associated With Increased DNA Damage and Decreased Survival in Murine Models of Obesity, 119
Mouse
Axl, A Receptor Tyrosine Kinase, Mediates Flow-Induced Vascular Remodeling, 1446
Mouse genetics
Cardiac-Specific Deletion of *Gata4* Reveals Its Requirement for Hypertrophy, Compensation, and Myocyte Viability, 837
GDF15/MIC-1 Functions As a Protective and Antihypertrophic Factor Released From the Myocardium in Association With SMAD Protein Activation, 342
Mouse heart development
Cardiomyocyte-Specific Deletion of the Coxsackievirus and Adenovirus Receptor Results in Hyperplasia of the Embryonic Left Ventricle and Abnormalities of Sinuatrial Valves, 923
Mouse models
Accelerated Arteriosclerosis of Vein Grafts in Inducible NO Synthase$^{-/-}$ Mice Is Related to Decreased Endothelial Progenitor Cell Repair, 412
mRNA stability
Angiotensin II and Stretch Activate NADPH Oxidase to Destabilize Cardiac Kv4.3 Channel mRNA, 1040
Muscarinic receptor
Endogenous RGS Proteins and Gα Subtypes Differentially Control Muscarinic and Adenosine-Mediated Chronotropic Effects, 659
Muscle fatigue
Effects of Congestive Heart Failure on Ca^{2+} Handling in Skeletal Muscle During Fatigue, 1514
Muscle, smooth
Common Protective and Diverse Smooth Muscle Cell Effects of AAV-Mediated Angiopoietin-1 and -2 Expression in Rat Cardiac Allograft Vasculopathy, 1373
Muscles
Critical Roles of Muscle-Secreted Angiogenic Factors in Therapeutic Neovascularization, 1194
Mutations
Arrhythmogenic Mutation-Linked Defects in Ryanodine Receptor Autoregulation Reveal a Novel Mechanism of Ca^{2+} Release Channel Dysfunction, 88
MyD88
Absence of TRAM Restricts Toll-Like Receptor 4 Signaling in Vascular Endothelial Cells to the MyD88 Pathway, 1134
Myocardial infarction
Adeno-Associated Virus-Mediated Transduction of VEGF165 Improves Cardiac Tissue Viability and Functional Recovery After Permanent Coronary Occlusion in Conscious Dogs, 954
Estrogen Receptor α Gene Variation Is Associated With Risk of Myocardial Infarction in More Than Seven Thousand Men From Five Cohorts, 590
Induction of HIF-1α and iNOS With siRNA: A Novel Mechanism for Myocardial Protection, 10
Synergism of Hematopoietic Cytokines for Infarct Repair, 990
Myocardial regeneration
Postinfarct Cytokine Therapy Regenerates Cardiac Tissue and Improves Left Ventricular Function, 1098
Synergism of Hematopoietic Cytokines for Infarct Repair, 990
Myocardial sheets
Myocyte Shearing, Myocardial Sheets, and Microtubules, 1
Myocardin
Myocardin Induces Cardiomyocyte Hypertrophy, 1089
Partnering Up for Cardiac Hypertrophy, 985
Myocardium
The Rac and Rho Hall of Fame: A Decade of Hypertrophic Signaling Hits, 730
Myofibroblast
Smooth Muscle Cell: A Key Cell for Plaque Vulnerability Regulation?, 448
Vascular Cell Locomotion: Osteopontin, NADPH Oxidase, and Matrix Metalloproteinase-9, 1453
Myosin accessory proteins
Myosin Binding Protein C in the Heart, 1234
Myosin binding protein C
Activation of Myocardial Contraction by the N-Terminal Domains of Myosin Binding Protein-C, 1290
Myosin kinetics
When Is a Fly in the Ointment a Solution and not a Problem?, 1110
Myosin phosphatase
Urocortin-Induced Decrease in Ca^{2+} Sensitivity of Contraction in Mouse Tail Arteries Is Attributable to cAMP-Dependent Dephosphorylation of MYPT1 and Activation of Myosin Light Chain Phosphatase, 1159

N

N-terminal acetyltransferase
Embryonic Growth-Associated Protein Is One Subunit of a Novel N-Terminal Acetyltransferase Complex Essential for Embryonic Vascular Development, 846
Na^+ channel
14-3-3 Is a Regulator of the Cardiac Voltage-Gated Sodium Channel Nav1.5, 1538
NADPH oxidase
Angiotensin II and Stretch Activate NADPH Oxidase to Destabilize Cardiac Kv4.3 Channel mRNA, 1040
Regulation of NADPH Oxidases: The Role of Rac Proteins, 453
The Serum- and Glucocorticoid-Inducible Kinase Sgk-1 Is Involved in Pulmonary Vascular Remodeling: Role in Redox-Sensitive Regulation of Tissue Factor by Thrombin, 828
Na–Ca exchanger
A Novel Mechanism of Pacemaker Control That Depends on High Levels of cAMP and PKA-Dependent Phosphorylation: A Precisely Controlled Biological Clock, 437
NBC
NBCn1 (slc4a7) Mediates the Na^+-Dependent Bicarbonate Transport Important for Regulation of Intracellular pH in Mouse Vascular Smooth Muscle Cells, 515
Near infrared imaging
Emerging Imaging Techniques, 879
Neointima
TRP Proteins: A New Dimension in the Treatment of Occlusive Vascular Disease, 446
Vascular Cell Locomotion: Osteopontin, NADPH Oxidase, and Matrix Metalloproteinase-9, 1453

Neointimal hyperplasia
Accelerated Arteriosclerosis of Vein Grafts in Inducible NO Synthase$^{-/-}$ Mice Is Related to Decreased Endothelial Progenitor Cell Repair, 412
Upregulated TRPC1 Channel in Vascular Injury In Vivo and Its Role in Human Neointimal Hyperplasia, 557
Neovascularization
Inseparably Tied: Functional and Antioxidative Capacity of Endothelial Progenitor Cells, 157
Neurogenic hypertension
Neurogenic Mechanisms Contribute to Hypertension in Mice With Disruption of the K-Cl Cotransporter KCC3, 549
Neuronal nitric oxide synthase
Hypercontractile Female Hearts Exhibit Increased *S*-Nitrosylation of the L-Type Ca^{2+} Channel α1 Subunit and Reduced Ischemia-Reperfusion Injury, 403
Neutrophils
Acute Antiinflammatory Properties of Statins Involve Peroxisome Proliferator-Activated Receptor-α via Inhibition of the Protein Kinase C Signaling Pathway, 361
NF-κB
Differential Regulation of Endothelial Cell Activation by Complement and Interleukin 1α, 793
Integrin-Mediated Transcriptional Activation of Inhibitor of Apoptosis Proteins Protects Smooth Muscle Cells Against Apoptosis Induced by Degraded Collagen, 1490
NFAT
Hypertrophic Cardiomyopathy: Exercise and Eat Right, 443
Nitric oxidative stress
Scavenger Receptor BI Prevents Nitric Oxide-Induced Cytotoxicity and Endotoxin-Induced Death, e60
Nitric oxide
Coupled and Uncoupled NOS: Separate But Equal? Uncoupled NOS in Endothelial Cells Is a Critical Pathway for Intracellular Signaling, 717
Endostatin, the Proteolytic Fragment of Collagen XVIII, Induces Vasorelaxation, 1203
Endothelial and Antithrombotic Actions of HDL, 1352
Endothelial Dysfunction and Hypertension in Rats Transduced With CYP4A2 Adenovirus, 962
A Female Way to Protect the Heart: Say NO to Calcium, 298
Role of Endothelial Nitric Oxide Synthase in the Regulation of SREBP Activation by Oxidized Phospholipids, 768
Scavenger Receptor BI Prevents Nitric Oxide-Induced Cytotoxicity and Endotoxin-Induced Death, e60
Nitric oxide synthase
Coupled and Uncoupled NOS: Separate But Equal? Uncoupled NOS in Endothelial Cells Is a Critical Pathway for Intracellular Signaling, 717
Direct Interaction of the Cell Division Cycle 37 Homolog Inhibits Endothelial Nitric Oxide Synthase Activity, 335
Nkx2–5
Formation of the Venous Pole of the Heart From an *Nkx2-5*-Negative Precursor Population Requires *Tbx18*, 1555
Quantitative Trait Loci Modifying Cardiac Atrial Septal Morphology and Risk of Patent Foramen Ovale in the Mouse, 651
Notch
Induction of Cardiogenesis in Embryonic Stem Cells via Downregulation of Notch1 Signaling, 1471
Smooth Muscle α-Actin Is a Direct Target of Notch/CSL, 1468
Nuclear factor κB
The Serum- and Glucocorticoid-Inducible Kinase Sgk-1 Is Involved in Pulmonary Vascular Remodeling: Role in Redox-Sensitive Regulation of Tissue Factor by Thrombin, 828
Nuclear receptors
Acute Antiinflammatory Properties of Statins Involve Peroxisome Proliferator-Activated Receptor-α via Inhibition of the Protein Kinase C Signaling Pathway, 361

O

Obesity
Cardiac Myocyte Apoptosis Is Associated With Increased DNA Damage and Decreased Survival in Murine Models of Obesity, 119
Five Easy Pieces: The Obesity Paradigm, 576
Optical mapping
Structure-Related Initiation of Reentry by Rapid Pacing in Monolayers of Cardiac Cells, e29
Osteopontin
An Osteopontin-NADPH Oxidase Signaling Cascade Promotes Pro-Matrix Metalloproteinase 9 Activation in Aortic Mesenchymal Cells, 1479
Vascular Cell Locomotion: Osteopontin, NADPH Oxidase, and Matrix Metalloproteinase-9, 1453
Outflow tract
Rotation of the Myocardial Wall of the Outflow Tract Is Implicated in the Normal Positioning of the Great Arteries, 421
Oxidative stress
Inseparably Tied: Functional and Antioxidative Capacity of Endothelial Progenitor Cells, 157
Oxidized LDL
Desensitization of Platelet-Derived Growth Factor Receptor-β by Oxidized Lipids in Vascular Cells and Atherosclerotic Lesions: Prevention by Aldehyde Scavengers, 785
Oxidized phospholipids
A Rancid Culprit in Vascular Inflammation Acts on the Prostaglandin Receptor EP2, 587
Role of Endothelial Nitric Oxide Synthase in the Regulation of SREBP Activation by Oxidized Phospholipids, 768
OxPAPC
Identification of Prostaglandin E2 Receptor Subtype 2 As a Receptor Activated by OxPAPC, 642
Oxygen
Hypoxia-Mediated Degradation of Na,K-ATPase via Mitochondrial Reactive Oxygen Species and the Ubiquitin-Conjugating System, 1314

P

P2 receptors
Extracellular Nucleotides and Adenosine Independently Activate AMP-Activated Protein Kinase in Endothelial Cells: Involvement of P2 Receptors and Adenosine Transporters, e39
Positive Inotropic Effects by Uridine Triphosphate (UTP) and Uridine Diphosphate (UDP) via $P2Y_2$ and $P2Y_6$ Receptors on Cardiomyocytes and Release of UTP in Man During Myocardial Infarction, 970
Pacemaker activity
Bradycardia and Slowing of the Atrioventricular Conduction in Mice Lacking $Ca_V3.1/\alpha_{1G}$ T-Type Calcium Channels, 1422
Paracrine effect
Bone Marrow Stem Cells Prevent Left Ventricular Remodeling of Ischemic Heart Through Paracrine Signaling, 1414
Particle-receptor interaction
Identification of a Novel Peptide That Interferes With the Chemical Regulation of Connexin43, 1365
Patent foramen ovale
Quantitative Trait Loci Modifying Cardiac Atrial Septal Morphology and Risk of Patent Foramen Ovale in the Mouse, 651
PDE
Role of Nuclear Ca^{2+}/Calmodulin-Stimulated Phosphodiesterase 1A in Vascular Smooth Muscle Cell Growth and Survival, 777
PDE2
Compartmentalized Phosphodiesterase-2 Activity Blunts β-Adrenergic Cardiac Inotropy via an NO/cGMP-Dependent Pathway, 226
PDGF receptor
Desensitization of Platelet-Derived Growth Factor Receptor-β by Oxidized Lipids in Vascular Cells and Atherosclerotic Lesions: Prevention by Aldehyde Scavengers, 785
Vesicular Trafficking of Tyrosine Kinase Receptors and Associated Proteins in the Regulation of Signaling and Vascular Function, 743
PDGF-BB
Diabetic Microangiopathy in Ischemic Limb Is a Disease of Disturbance of the Platelet-Derived Growth Factor-BB/Protein Kinase C Axis but Not of Impaired Expression of Angiogenic Factors, 55
Molecular Basis of Angiopathy in Diabetes Mellitus, 4

PDZ
Syndecan-4 Clustering Induces Cell Migration in a PDZ-Dependent Manner, 1398
Pericyte
Dexamethasone Downregulates Calcification-Inhibitor Molecules and Accelerates Osteogenic Differentiation of Vascular Pericytes: Implications for Vascular Calcification, 1264
Diabetic Microangiopathy in Ischemic Limb Is a Disease of Disturbance of the Platelet-Derived Growth Factor-BB/Protein Kinase C Axis but Not of Impaired Expression of Angiogenic Factors, 55
Peripheral vascular disease
Raised Plasma Soluble P-Selectin in Peripheral Arterial Occlusive Disease Enhances Leukocyte Adhesion, 149
Peroxisome proliferator-activated receptor
Activation of Peroxisome Proliferator-Activated Receptor γ Suppresses Telomerase Activity in Vascular Smooth Muscle Cells, e50
Elevated Homocysteine Reduces Apolipoprotein A-I Expression in Hyperhomocysteinemic Mice and in Males With Coronary Artery Disease, 564
Phosphate transport
Pitting Phosphate Transport Inhibitors Against Vascular Calcification, 857
Phosphatidylinositol 3-kinase
Mission Impossible: IGF-1 and PTEN Specifically "Akt"ing on Cardiac L-Type Ca^{2+} Channels, 1349
Phosphodiesterase
Is cAMP Good or Bad? Depends on Where It's Made, 582
Soluble Adenylyl Cyclase Reveals the Significance of cAMP Compartmentation on Pulmonary Microvascular Endothelial Cell Barrier, 675
A Specific Pattern of Phosphodiesterases Controls the cAMP Signals Generated by Different G_s-Coupled Receptors in Adult Rat Ventricular Myocytes, 1081
Phosphorylation
Maximum Phosphorylation of the Cardiac Ryanodine Receptor at Serine-2809 by Protein Kinase A Produces Unique Modifications to Channel Gating and Conductance Not Observed at Lower Levels of Phosphorylation, 1506
Selectivity of Connexin 43 Channels Is Regulated Through Protein Kinase C-Dependent Phosphorylation, 1498
PI3K
Insulin-Like Growth Factor-1 and PTEN Deletion Enhance Cardiac L-Type Ca^{2+} Currents via Increased PI3Kα/PKB Signaling, 1390
The Transforming Growth Factor-β Superfamily Member Growth-Differentiation Factor-15 Protects the Heart From Ischemia/Reperfusion Injury, 351
Pit-1
Pitting Phosphate Transport Inhibitors Against Vascular Calcification, 857
Role of the Sodium-Dependent Phosphate Cotransporter, Pit-1, in Vascular Smooth Muscle Cell Calcification, 905
Pitx2
Rotation of the Myocardial Wall of the Outflow Tract Is Implicated in the Normal Positioning of the Great Arteries, 421
PKA
Urocortin-Induced Decrease in Ca^{2+} Sensitivity of Contraction in Mouse Tail Arteries Is Attributable to cAMP-Dependent Dephosphorylation of MYPT1 and Activation of Myosin Light Chain Phosphatase, 1159
PKC
Acute Antiinflammatory Properties of Statins Involve Peroxisome Proliferator-Activated Receptor-α via Inhibition of the Protein Kinase C Signaling Pathway, 361
Diabetic Microangiopathy in Ischemic Limb Is a Disease of Disturbance of the Platelet-Derived Growth Factor-BB/Protein Kinase C Axis but Not of Impaired Expression of Angiogenic Factors, 55
Planar cell polarity
Mechanical and Chemical Regulation of Endothelial Cell Polarity, 863
Shear Stress Regulates Forward and Reverse Planar Cell Polarity of Vascular Endothelium In Vivo and In Vitro, 939
Plaque stability
Antigen-Independent Targeting of Long-Lived $CD4^+$ Cytolytic T Effector Cells to Lesions of Atherosclerosis, 434
Plasminogen activator inhibitor-1 promoter
Foxc2 Is a Common Mediator of Insulin and Transforming Growth Factor β Signaling to Regulate Plasminogen Activator Inhibitor Type I Gene Expression, 626
Platelet adhesion
Cellular Pathology of Atherosclerosis: Smooth Muscle Cells Promote Adhesion of Platelets to Cocultured Endothelial Cells, 98
Platelets
Adherent Platelets Recruit and Induce Differentiation of Murine Embryonic Endothelial Progenitor Cells to Mature Endothelial Cells In Vitro, e2
De Novo Synthesis of Cyclooxygenase-1 Counteracts the Suppression of Platelet Thromboxane Biosynthesis by Aspirin, 593
Polymerization
ACE Polymorphisms, 1123
Postnatal vasculogenesis
Caveolin Plays a Central Role in Endothelial Progenitor Cell Mobilization and Homing in SDF-1-Driven Postischemic Vasculogenesis, 1219
Potassium channels
Angiotensin II and Stretch Activate NADPH Oxidase to Destabilize Cardiac Kv4.3 Channel mRNA, 1040
Calmodulin Is Essential for Cardiac I_{KS} Channel Gating and Assembly: Impaired Function in Long-QT Mutations, 1055
Impact of TASK-1 in Human Pulmonary Artery Smooth Muscle Cells, 1072
A New Role for Calmodulin in Ion Channel Biology, 979
Serotonin-Induced Inhibition of K_V Current: A Supporting Role in Pulmonary Vasoconstriction?, 860
Silent Inward Rectifier K^+ Channels in Hypercholesterolemia, 982
Potassium ion channels hypertension
Serotonin Inhibits Voltage-Gated K^+ Currents in Pulmonary Artery Smooth Muscle Cells: Role of 5-HT_{2A} Receptors, Caveolin-1, and K_V1.5 Channel Internalization, 931
PPAR
High-Density Lipoprotein Hydrolysis by Endothelial Lipase Activates PPARα: A Candidate Mechanism for High-Density Lipoprotein-Mediated Repression of Leukocyte Adhesion, 490
Novel Faces to Old Friends: A Central Role of Inducible NO Synthase for Progenitor Cell Recruitment and a New Antiinflammatory Mechanisms of Statins, 303
Preconditioning
Bone Marrow Stem Cells Prevent Left Ventricular Remodeling of Ischemic Heart Through Paracrine Signaling, 1414
Processing
A New Role for Calmodulin in Ion Channel Biology, 979
Progenitor cells
Accelerated Arteriosclerosis of Vein Grafts in Inducible NO Synthase$^{-/-}$ Mice Is Related to Decreased Endothelial Progenitor Cell Repair, 412
Erythropoietin-Mobilized Endothelial Progenitors Enhance Reendothelialization via Akt-Endothelial Nitric Oxide Synthase Activation and Prevent Neointimal Hyperplasia, 1405
Inseparably Tied: Functional and Antioxidative Capacity of Endothelial Progenitor Cells, 157
Novel Faces to Old Friends: A Central Role of Inducible NO Synthase for Progenitor Cell Recruitment and a New Antiinflammatory Mechanisms of Statins, 303
Proliferation
Activation of Peroxisome Proliferator-Activated Receptor γ Suppresses Telomerase Activity in Vascular Smooth Muscle Cells, e50
Altered S-Phase Kinase-Associated Protein-2 Levels Are a Major Mediator of Cyclic Nucleotide-Induced Inhibition of Vascular Smooth Muscle Cell Proliferation, 1141
Excitation-Transcription Coupling in Arterial Smooth Muscle, 868
Nuclear Signaling in Smooth Muscle Cells: Cyclic Nucleotide Phosphodiesterase 1A Moves In, 720
Prolyl 4-hydroxylase-2
Induction of HIF-1α and iNOS With siRNA: A Novel Mechanism for Myocardial Protection, 10
Prostacyclin
Endothelial and Antithrombotic Actions of HDL, 1352

Prostaglandin H_2
Increased Expression of Cyclooxygenase-2 Mediates Enhanced Contraction to Endothelin ET_A Receptor Stimulation in Endothelial Nitric Oxide Synthase Knockout Mice, 1439
Prostaglandin receptor
A Novel Prostaglandin E Receptor 4-Associated Protein Participates in Antiinflammatory Signaling, 499
A Rancid Culprit in Vascular Inflammation Acts on the Prostaglandin Receptor EP2, 587
Prostanoids
COX-2, Another Important Player in the Nitric Oxide-Endothelin Cross-Talk: Good News for COX-2 Inhibitors?, 1344
Proteasome
Hypoxia-Mediated Degradation of Na,K-ATPase via Mitochondrial Reactive Oxygen Species and the Ubiquitin-Conjugating System, 1314
Protein C
Endothelial and Antithrombotic Actions of HDL, 1352
Protein kinase A
β-Adrenergic Stimulation of L-type Ca^{2+} Channels in Cardiac Myocytes Requires the Distal Carboxyl Terminus of α_{1C} but Not Serine 1928, e11
High Basal Protein Kinase A-Dependent Phosphorylation Drives Rhythmic Internal Ca^{2+} Store Oscillations and Spontaneous Beating of Cardiac Pacemaker Cells, 505
Protein kinase A phosphorylation
Compartmentation of Cyclic Nucleotide Signaling in the Heart: The Role of A-Kinase Anchoring Proteins, 993
Protein kinase Akt
Mission Impossible: IGF-1 and PTEN Specifically "Akt"ing on Cardiac L-Type Ca^{2+} Channels, 1349
Protein synthesis
De Novo Synthesis of Cyclooxygenase-1 Counteracts the Suppression of Platelet Thromboxane Biosynthesis by Aspirin, 593
Proteomics
Proteomics of the Heart: Unraveling Disease, 309
Pseudomonas aeruginosa
Is cAMP Good or Bad? Depends on Where It's Made, 582
Soluble Adenylyl Cyclase Reveals the Significance of cAMP Compartmentation on Pulmonary Microvascular Endothelial Cell Barrier, 675
PTEN
Insulin-Like Growth Factor-1 and PTEN Deletion Enhance Cardiac L-Type Ca^{2+} Currents via Increased PI3Kα/PKB Signaling, 1390
Pulmonary arterial hypertension
Bone Morphogenetic Protein Receptor-2 Signaling Promotes Pulmonary Arterial Endothelial Cell Survival: Implications for Loss-of-Function Mutations in the Pathogenesis of Pulmonary Hypertension, 209
Serotonin Increases Susceptibility to Pulmonary Hypertension in *BMPR2*-Deficient Mice, 818
Serotonin Signaling in Pulmonary Hypertension, 1229
Pulmonary arteries
Serotonin Inhibits Voltage-Gated K^+ Currents in Pulmonary Artery Smooth Muscle Cells: Role of 5-HT_{2A} Receptors, Caveolin-1, and $K_V1.5$ Channel Internalization, 931
TRPC Channel Upregulation in Chronically Hypoxic Pulmonary Arteries: The HIF-1 Bandwagon Gathers Steam, 1465
Pulmonary artery smooth muscle cells
The Serum- and Glucocorticoid-Inducible Kinase Sgk-1 Is Involved in Pulmonary Vascular Remodeling: Role in Redox-Sensitive Regulation of Tissue Factor by Thrombin, 828
Pulmonary circulation
Impact of TASK-1 in Human Pulmonary Artery Smooth Muscle Cells, 1072
Spatio-Temporal Diversity of Apoptosis Within the Vascular Wall in Pulmonary Arterial Hypertension: Heterogeneous BMP Signaling May Have Therapeutic Implications, 172
Pulmonary hypertension
Serotonin-Induced Inhibition of K_V Current: A Supporting Role in Pulmonary Vasoconstriction?, 860
Spatio-Temporal Diversity of Apoptosis Within the Vascular Wall in Pulmonary Arterial Hypertension: Heterogeneous BMP Signaling May Have Therapeutic Implications, 172
Transgenic Mice Overexpressing the 5-Hydroxytryptamine Transporter Gene in Smooth Muscle Develop Pulmonary Hypertension, 1323
TRPC Channel Upregulation in Chronically Hypoxic Pulmonary Arteries: The HIF-1 Bandwagon Gathers Steam, 1465
Pulmonary vascular remodeling
The Serum- and Glucocorticoid-Inducible Kinase Sgk-1 Is Involved in Pulmonary Vascular Remodeling: Role in Redox-Sensitive Regulation of Tissue Factor by Thrombin, 828

Q

Quantitative trait locus
Quantitative Trait Loci Modifying Cardiac Atrial Septal Morphology and Risk of Patent Foramen Ovale in the Mouse, 651
Quantum dots
Emerging Imaging Techniques, 879
